Navigator Production Process

Feature Starts → Targeted Delivery Set → BRD Created →

- Sketches / Workshops
- Stories Written
- Upfront UX Research

→ UX Production → PO Sign-off → Dev Production → Desk Check → UAT Testing → Feature Launch

UX Production

BRD Edits → UX Design & Research → Story Edits

While the designs are being developed and reviewed with the product teams, decisions and changes are being made. As the project evolves, edits are made to the BRD and stories. Keeping the designs, stories and BRD in alignment will reduce complications during development and prevent delays.
